17 **TITLE IV—COMPASSIONATE**
18 **COMMUNICATION ON HIPAA**

19 **SEC. 401. SENSE OF CONGRESS.**

20 (a) FINDINGS.—Congress finds the following:

21 (1) The vast majority of individuals with mental
22 illness are capable of understanding their illness and
23 caring for themselves.

24 (2) Persons with serious mental illness (in this
25 section referred to as “SMI”), including schizo-

1 phrenia spectrum, bipolar disorders, and major de-
2 pressive disorder, may be significantly impaired in
3 their ability to understand or make sound decisions
4 for their care and needs. By nature of their illness,
5 cognitive impairments in reasoning and judgment, as
6 well as the presence of hallucinations, delusions, and
7 severe emotional distortions, they may lack the
8 awareness they even have a mental illness (a condi-
9 tion known as anosognosia), and thus may be unable
10 to make sound decisions regarding their care, nor
11 follow through consistently and effectively on their
12 care needs.

13 (3) Persons with mental illness or SMI may re-
14 require and benefit from mental health treatment in
15 order to recover to the fullest extent of their ability;
16 these beneficial interventions may include psychiatric
17 care, psychological care, medication, peer support,
18 educational support, employment support, and hous-
19 ing support.

20 (4) Persons with SMI who are provided with
21 professional and supportive services may still experi-
22 ence times when their symptoms may greatly impair
23 their abilities to make sound decisions for their per-
24 sonal care or may discontinue their care as a result
25 of this impaired decision making resulting in a fur-

1 ther deterioration of their condition. They may expe-
2 rience a temporary or prolonged impairment as a re-
3 sult of their diminished capacity to care for them-
4 selves.

5 (5) Episodes of psychiatric crises among those
6 with SMI can result in neurological harm to the in-
7 dividual's brain.

8 (6) Persons with SMI—

9 (A) are at high risk for other chronic phys-
10 ical illnesses, with approximately 50 percent
11 having two or more co-occurring chronic phys-
12 ical illnesses such as cardiac, pulmonary, can-
13 cer, and endocrine disorders; and

14 (B) have three times the odds of having
15 chronic bronchitis, five times the odds of having
16 emphysema, and four times the odds of having
17 COPD, are more than four times as likely to
18 have fluid and electrolyte disorders, and are
19 nearly three times as likely to be nicotine de-
20 pendent.

21 (7) Some psychotropic medications, such as sec-
22 ond generation antipsychotics, significantly increase
23 risk for chronic illnesses such as diabetes and car-
24 diovascular disease.

1 (8) When the individual fails to seek or main-
2 tain treatment for these physical conditions over a
3 long term, it can result in the individual becoming
4 gravely disabled, or developing life-threatening ill-
5 nesses. Early and consistent treatment can amelio-
6 rate or reduce symptoms or cure the disease.

7 (9) Persons with SMI die 7 to 24 years earlier
8 than their age cohorts primarily because of com-
9 plications from their chronic physical illness and fail
10 to seek or maintain treatment resulting from emo-
11 tional and cognitive impairments from their SMI.

12 (10) It is beneficial to the person with SMI and
13 chronic illness to seek and maintain continuity of
14 medical care and treatment for their mental illness
15 to prevent further deterioration and harm to their
16 own safety.

17 (11) When the individual with SMI is signifi-
18 cantly diminished in their capacity to care for them-
19 selves long term or acutely, other supportive inter-
20 ventions to assist their care may be necessary to
21 protect their health and safety.

22 (12) Prognosis for the physical and psychiatric
23 health of those with SMI may improve when respon-
24 sible caregivers facilitate and participate in care.

1 (13) When an individual with SMI is chron-
2 ically incapacitated in their ability to care for them-
3 selves, caregivers can pursue legal guardianship to
4 facilitate care in appropriate areas while being mind-
5 ful to allow the individual to make decisions for
6 themselves in areas where they are capable.

7 (14) Individuals with SMI who have prolonged
8 periods of being significantly functional can, during
9 such periods, design and sign an advanced directive
10 to predefine and choose medications, providers,
11 treatment plans, and hospitals, and provide care-
12 givers with guardianship the ability to help in those
13 times when a patient's psychiatric symptoms worsen
14 to the point of making them incapacitated or leaving
15 them with a severely diminished capacity to make in-
16 formed decisions about their care which may result
17 in harm to their physical and mental health.

18 (15) All professional and support efforts should
19 be made to help the individual with SMI and experi-
20 ence acute or chronic physical illnesses to under-
21 stand and follow through on treatment.

22 (16) When individuals with SMI, even after ef-
23 forts to help them understand, have failed to care
24 for themselves, there exists confusion in the health
25 care community around what is currently permis-

1 sible under HIPAA rules. This confusion may hinder
2 communication with responsible caregivers who may
3 be able to facilitate care for the patient with SMI in
4 instances when the individual does not give permis-
5 sion for disclosure.

6 (b) SENSE OF CONGRESS.—It is the sense of the
7 Congress that, for the sake of the health and safety of
8 persons with serious mental illness, more clarity is needed
9 surrounding the existing HIPAA privacy rule promulgated
10 pursuant to section 264(c) of the Health Insurance Port-
11 ability and Accountability Act (42 U.S.C. 1320d–2 note)
12 to permit health care professionals to communicate, when
13 necessary, with responsible known caregivers of such per-
14 sons, the limited, appropriate protected health information
15 of such persons in order to facilitate treatment, but not
16 including psychotherapy notes.

17 **SEC. 402. CONFIDENTIALITY OF RECORDS.**

18 Not later than one year after the date on which the
19 Secretary of Health and Human Services first finalizes
20 regulations updating part 2 of title 42, Code of Federal
21 Regulations (relating to confidentiality of alcohol and drug
22 abuse patient records) after the date of enactment of this
23 Act, the Secretary shall convene relevant stakeholders to
24 determine the effect of such regulations on patient care,
25 health outcomes, and patient privacy. The Secretary shall

1 submit to the Committee on Energy and Commerce of the
2 House of Representatives and the Committee on Health,
3 Education, Labor, and Pensions of the Senate, and make
4 publicly available, a report on the findings of such stake-
5 holders.

6 **SEC. 403. CLARIFICATION OF CIRCUMSTANCES UNDER**
7 **WHICH DISCLOSURE OF PROTECTED HEALTH**
8 **INFORMATION IS PERMITTED.**

10 date of enactment of this section, the Secretary of Health

14 rity Act and regulations promulgated pursuant to section
15 264(e) of the Health Insurance Portability and Account-
16 ability Act of 1996, a health care provider or covered enti-
17 ty may disclose the protected health information of a pa-
18 tient with a mental illness, including for purposes of—

19 (1) communicating (including with respect to
20 treatment, side effects, risk factors, and the avail-
21 ability of community resources) with a family mem-
22 ber of such patient, caregiver of such patient, or
23 other individual to the extent that such family mem-
24 ber, caregiver, or individual is involved in the care
25 of the patient;

1 (2) communicating with a family member of the
2 patient, caregiver of such patient, or other individual

11 with the family or caregivers of the patient when—

12 (A) the patient consents;

13 (B) the patient does not consent, but the
14 patient lacks the capacity to agree or object and
15 the communication or sharing of information is
16 in the patient's best interest;

17 (C) the patient does not consent and the
18 patient is not incapacitated or in an emergency
19 circumstance, but the ability of the patient to
20 make rational health care decisions is signifi-
21 cantly diminished by reason of the physical or
22 mental health condition of the patient; and

23 (D) the patient does not consent, but such
24 communication and sharing of information is
25 necessary to prevent impending and serious de-

1 terioration of the patient's mental or physical
2 health;

3 (6) involving a patient's family members, care-
4 givers, or others involved in the patient's care or
5 care plan, including facilitating treatment and medi-
6 cation adherence, in dealing with patient failures to
7 adhere to medication or other therapy;

8 (7) listening to or receiving information with re-
9 spect to the patient from the family or caregiver of
10 such patient receiving mental illness treatment;

11 (8) communicating with family members of the
12 patient, caregivers of patient, law enforcement, or
13 others when the patient presents a serious and im-
14 minent threat of harm to self or others; and

15 (9) communicating to law enforcement and
16 family members of the patient or caregivers of the
17 patient about the admission of the patient to receive
18 care at a facility or the release of a patient who was
