A Message from Mike Lawrie

In FY 2016, we made significant strides in CSC’s business transformation. We separated the company into two publicly traded businesses, both with the right capabilities to lead clients’ digital transformations. Building on this momentum, we announced the proposed merger of CSC with the Enterprise Services business of Hewlett Packard Enterprise to create one of the world’s largest pure-play IT services companies.

As we reshaped our business, we also made tremendous progress in our corporate responsibility efforts. This progress is underscored by our best-ever ranking of #13 on *CR Magazine’s* list of Best Corporate Citizens for 2016. Marking a 22-point improvement in just 1 year, this prestigious recognition acknowledges that doing good for people, their communities and the environment is also good for business. Our FY 2016 sustainability achievements include:

- Implementing a comprehensive sustainability strategy that cut energy usage by 14.6% and greenhouse gas emissions by 14.3% against our 2012 baseline
- Empowering our employees with nearly 1 million hours of training in next-generation technology skills and in-demand certifications

- Working with nongovernmental organizations and charities such as *FIRST* Robotics and Habitat for Humanity to promote STEM learning, improve wellness and provide disaster relief
- Implementing digital inclusion programs to tailor CSC solutions for use by people with disabilities and to teach basic digital skills to at-risk children
- Receiving a perfect score of 100% on the most recent Disability Equality Index (DEI)

With new capabilities, greater reach and improved focus, CSC is uniquely positioned to help clients embrace digital technologies for improved decision making and productivity across the enterprise. We look forward to leading our clients’ digital transformations while continuing to bring the same innovative, collaborative spirit to our social and environmental priorities.

Mike Lawrie
Chairman, President and Chief Executive Officer
CSC

“Next-generation information technology has transformed how we live, work, communicate and consume. In all corners of the world, technology is helping people rise out of poverty and discover better, more efficient ways of using energy and natural resources.”

— MIKE LAWRIE, Chairman, President and Chief Executive Officer, CSC

Except where indicated, this report presents data and other information for CSC’s fiscal year (FY) 2016, ending April 1, 2016.

LEADING DIGITAL TRANSFORMATIONS

Through partnerships and acquisitions, CSC continues to assemble the right capabilities to help our clients harness digital technologies for improved decision making, greater productivity and the creation of new business models.

CSC leads clients on their digital transformation journeys, providing innovative next-generation technology solutions and services that leverage deep industry expertise, global scale, technology independence and an extensive partner community.

By forming CeleritiFinTech, a joint venture with HCL, we are providing advanced core banking platforms and services that help banks digitally transform, drive product innovation and differentiate the customer experience.

Our acquisition of Fixnetix, a leading provider of front-office managed trading solutions, enables us to provide expanded as-a-service capabilities and deliver greater efficiency and innovation in trading, market data, trading access, liquidity venue connectivity, pre-trade risk and execution management.

We established a leadership position in the fast-growing Software-as-a-Service (SaaS) market with our acquisition of Fruition Partners, the leading provider of solutions for the service management sector and the largest ServiceNow-exclusive consulting firm.

Our acquisition of UXC Limited created the largest independent IT services company in Australia, with deep industry expertise in infrastructure and consulting services along with ServiceNow, SAP, Oracle and Microsoft Dynamics capabilities.

CSC formed the top provider of core insurance solutions globally through the recent acquisition of Xchanging, a provider of technology-enabled business solutions to organizations in global insurance and financial services, healthcare, manufacturing, real estate and the public sector.

Corporate Governance

PERFORMANCE WITH INTEGRITY

Chartered by the Board of Directors, the CSC Ethics and Compliance Office (ECO) promotes a culture of performance with integrity across the global CSC community. Through the ECO we maintain a strong focus on encouraging ethical conduct, reinforcing our CLEAR Values and driving compliance with the CSC Code of Business Conduct, internal policies and the law.

Reflecting U.S. Federal Sentencing Guidelines for compliance programs, the ECO also aligns with many other good governance frameworks, including the NYSE Corporate Governance Rules and the Sarbanes-Oxley Act. Comprehensive, ECO-managed programs and resources help strengthen the ethical foundations of our business:

- **CSC OpenLine.** A confidential, multilingual, always-available channel to request ethics advice and report violations of CSC’s Code of Business Conduct or the law
- **Annual Ethics and Code of Business Conduct Training.** An engaging, on-the-go learning experience for all employees with a focus on culture, values and integrity as well as reminders of how to resolve ethical dilemmas and report misconduct

FIGHTING CORRUPTION

Despite increased multilateral conventions and domestic laws with extraterritorial reach, bribery and related forms of corrupting market influence continue to obstruct economic and social development worldwide. At CSC, we focus our dedicated anticorruption program on mitigating corruption risks and promoting strict compliance with the law. Complementing our global anticorruption policies are targeted measures to control risk in gift and hospitality expenditures and in contracting with third parties to assist with business development internationally.

“Ethics, integrity and values are not options or alternatives that we choose to embrace or discard whenever convenient. They are the unchanging principles we apply every day to align our internal compass with ‘true north.’ By dealing honestly with others, valuing the facts and refusing to take shortcuts, everyone at CSC makes an essential contribution to a secure future for our company.”

— CHRIS DePIPPPO, Chief Ethics and Compliance Officer, CSC

CORPORATE RESPONSIBILITY GOVERNANCE

With executive representation from across our global operations, the CSC Corporate Responsibility (CR) Steering Committee brings consistency and innovation to the planning and execution of our overall CR strategy and policies. The CR Steering Committee and our global CR team collaborate to establish, update and implement a tailored strategic plan that emphasizes priorities of environmental sustainability, client service, community involvement and employee opportunity.

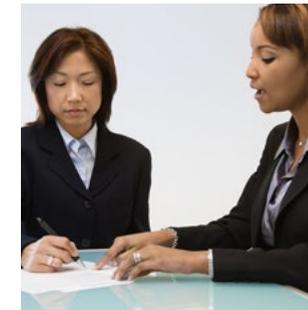

RISK MANAGEMENT. PRIVACY PROTECTIONS. SERVICE TO STAKEHOLDERS.

Through prudent execution of business strategies, risk management, strong corporate governance and top-quality talent and succession planning, the CSC Board of Directors focuses on enabling the company to achieve exceptional performance and create tangible value for our shareholders over the long term. Our proven leadership structure enables senior management to monitor risk from day to day while the Board provides thorough oversight of overall risk management, the integrity of financial statements and public disclosures, our progress with major strategic initiatives and adherence to ethical standards. To further strengthen our Enterprise Risk Management (ERM) function, the Board recently deployed global processes, definitions and tools to proactively address operational, financial, compliance and strategic risks and opportunities.

Privacy and Data Protection

Through a dedicated Global Privacy and Data Protection Office, we enforce clear limits on how we collect, use and disclose personal data of employees and other stakeholders. CSC uses our world-class cybersecurity expertise to deliver our information security program to protect CSC and client information and services from cyberattacks and other information security threats, as well as achieve regulatory compliance.

Intellectual Property

To safeguard intellectual property, CSC requires employees and contractors to sign non-disclosure agreements, implements security measures such as data encryption, and limits use and distribution of trade secrets. Incentives encourage employees to invent new technologies and contribute to CSC's patent portfolio.

Information Management

Encompassing printed reports, email, texts, voicemail, videos, Web pages and more, our Global Information Management program enables CSC to harness the technology-driven information explosion to strengthen our business and comply more efficiently with ethics and regulatory mandates.

Business Resilience

Our holistic business resilience approach brings together corporate and regional crisis management, business continuity and emergency response to enable executive-level

decision making during crises, continuity of operations during business disruptions, and evacuations and other processes during site-level emergencies.

Global Trade Controls

As a trusted supplier to global aerospace and defense contractors, CSC maintains strict compliance with industry regulations, contract requirements and our own data protection, security, and shipping and export control policies that relate to international data and technology transfers and the movement of military and commercial material.

SHARING IN SUCCESS

Shareholders are key participants in CSC's governance, and over the past 4 years Mike Lawrie has regularly met with our investors to gain their perspectives. At our annual Investor Day event, we host executive presentations and dialogues with institutional investors and analysts to present the latest information about CSC, to address questions, and to listen.

CLIENT FOCUSED

Our success derives from a deep understanding of our clients, to whom all of CSC is committed to deliver exceptional service and value.

LEADERSHIP

We lead from the front, displaying our integrity and using facts to support our straight talk. We create an environment for positive change built on collaboration and trust.

EXECUTION EXCELLENCE

We insist on excellence in all we do for clients and ourselves, striving always for recognition among the leaders in our industry.

ASPIRATION

We aspire individually and collectively to be more tomorrow than we are today.

RESULTS

We accept individual responsibility for our commitments and expect to be accountable for results.

CLEAR PRIORITIES

As the distinguishing hallmarks of CSC's performance and reputation, our CLEAR Values define all we do and who we are. By living our CLEAR Values every day, we build the solid foundation of integrity, straight talk, collaboration and results we need to drive business growth and lead our markets.

MANAGING SIGNIFICANT ISSUES

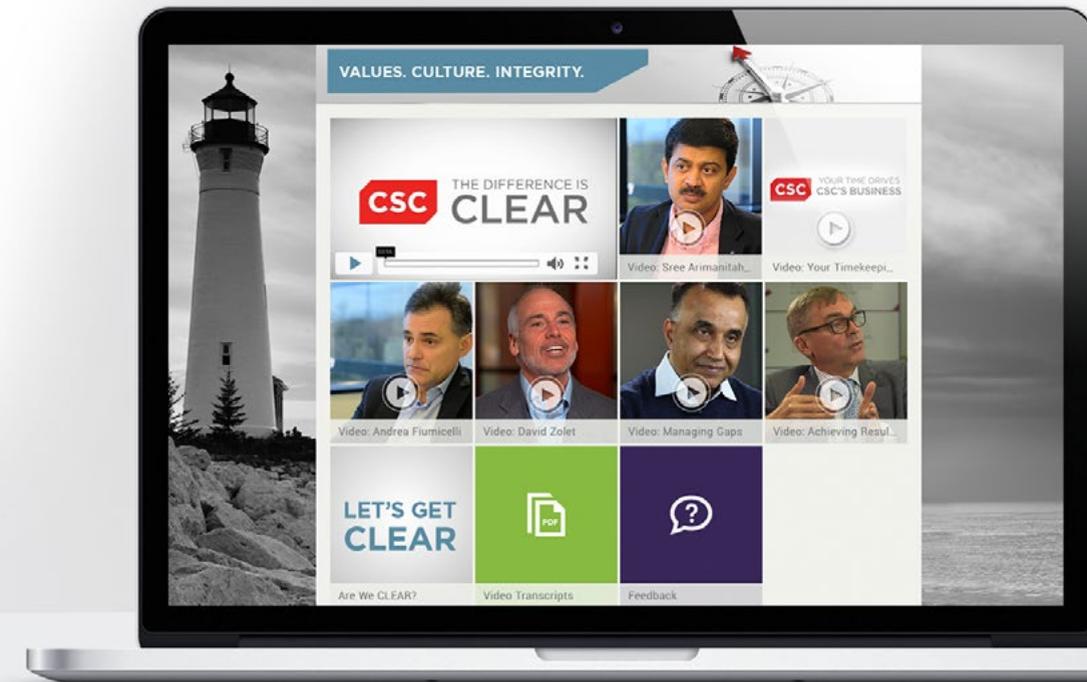

With yearly reviews of current and emerging significant issues that have financial, operational, reputational or societal impacts, we are able to more efficiently manage issues and risks and ensure sound governance of our global business operations. See our latest GRI G4 Report for a more detailed analysis, aligned to the new sustainable development goals.

TOP SUSTAINABILITY PRIORITIES COVERING BUSINESS, SOCIAL AND ENVIRONMENTAL ISSUES

Economic Performance	Economic value generated and distributed; climate change risks and opportunities
Environment	Sustainable energy management, transportation and travel, resource use and e-waste
Social Capital	Data privacy and cybersecurity
Recruitment and Talent Management Development	Training, retention, diversity and inclusion, employee engagement
Products and Services	A design process for our products and services that considers environmental efficiency and positive social impact
Leadership and Governance	Responsible supply chain, business continuity, management of intellectual property, ethics and compliance

VOICING INTEGRITY

Launched in 2015, CSC’s “Values. Culture. Integrity.” video library brings together a wealth of information in a user-friendly format to help the entire CSC community live and apply our CLEAR Values. Employees access specially created videos on demand to learn how CSC leaders across the world leverage our CLEAR Values to execute business strategies, hear straight talk from colleagues about integrity and honesty and explore new ways to strengthen our culture of performance with integrity.

Clients and Partners

POWERING THE DIGITAL ENTERPRISE

PARTNERING FOR IMPROVED PATIENT CARE

Digital Ambulances That Save Time and Lives

Regional governments in Denmark sought to improve coordination between paramedics and hospitals during medical emergencies.

CSC implemented our digital Pre-Hospital Patient Journal solution to give ambulance workers the ability to record and communicate patient data without the need for time-consuming paper- and telephone-based processes. Adopted throughout Denmark and nominated for a national Digital Welfare Award, our next-gen system helps optimize data delivery for more effective pre-hospital care that has reduced errors, improved patient treatment and saved lives.

Chronic-Care Innovations

CSC is enabling Reliance ACO, a Michigan-based accountable care organization, to support vulnerable, elderly patients with

chronic care management (CCM) capabilities that are the first of their kind in U.S. health-care. Our CCM solution gives the client a simple, efficient technology-based approach to fully participate in a federal program that seeks to improve quality of life for senior citizens with at least two chronic conditions.

Setting New Standards

CSC is helping NHS Trafford Clinical Commissioning Group, a UK healthcare provider to 220,000 citizens, pioneer an innovative care coordination center that seamlessly meets patient needs. Based on a new care model that works like air traffic control, our solution tracks patients as they move through the system and efficiently guides them to the right services and care. With its customizable and more patient-centric approach, the client has improved the patient experience by better coordinating primary, secondary and tertiary care while also reducing bureaucracy and costs.

WELLNESS IN THE CLOUD

A large UK eyeglass retailer, Specsavers, sought to improve business agility once it added hearing health products in response to a National Health Service (NHS) initiative. With a private cloud solution, CSC has enabled the company to offer digital hearing aids, hearing tests and aftercare at dedicated service centers free of charge for many qualifying customers.

Research Firm Black Book Ranks CSC #1 in E-Health Optimization

SUPPORTING PUBLIC SAFETY AND NEXT-GEN TRANSPORTATION

Digital Policing

CSC is helping the UK Metropolitan Police Service (MPS) create a mobile-enabled digital policing workplace through our CSC MyWorkStyle™ as-a-service solution. With our support, the MPS will provide employees with increased flexibility to perform their essential public-safety missions via secure access to information and applications, onsite and off-site. Services to first responders, managers and other police personnel encompass virtual desktops, mobility, email, instant messaging and more.

Efficient Networks

CSC provides network managed services for Transport for New South Wales across its 1,200 sites, including administration offices, motor registries, roadside depots and railway stations. Through this partnership we manage seven separate legacy networks in addition to various next-generation technologies being deployed in a network refresh, helping the client serve stakeholders efficiently and effectively.

CSC serves more than 1,000 commercial and international public sector enterprises worldwide.

Eco-Friendly Transit

The City of Stockholm asked CSC to help eliminate the use of conventional tickets by moving the public transit network to a fully digital travel-card system. Also used by transit agencies in Denmark and Norway, our Boomerang solution provides a 360-degree view of the customer for improved service while enhancing security and sustainability. The client has reduced waste and costs as riders quickly navigate ticketing and other tasks without the need for printed materials.

JOINING FORCES FOR EDUCATION

CSC subsidiary UXC Keystone is collaborating with Federation University Australia (FedUni) to help transform the multi-campus university's IT infrastructure and support its transition into an institution with a true global outlook. Headquartered in Victoria, Australia, FedUni relies on CSC alliance partner ServiceNow's cloud-based enterprise service management software solution to provide students and staff members with a better user experience via new insights into IT operations and new tools for deploying computing resources.

Federation University

AWARD-WINNING COLLABORATION

In recognition of our highly productive 15-year service partnership, CSC and BlueScope Steel won the Best Long-Term Sourcing Relationship award at the ISG 2015 ANZ Paragon Awards.

INNOVATION AND VALUE. SERVICE AND SUSTAINABILITY.

CSC helps commercial and international public sector organizations modernize business processes, applications and infrastructure with next-generation solutions to create more efficient and more sustainable digital enterprises:

- **Cloud.** Using centralized, highly scalable cloud services with virtualization and work-load consolidation to reduce data center cooling needs and energy consumption
- **Virtual Desktops.** Improving workstation energy efficiency across large user organizations with flexible virtual desktops that make personal computers obsolete
- **Telepresence as a Service.** Harnessing immersive videoconferencing for “face-to-face” meetings worldwide, reducing fossil-fuel use and travel costs
- **Data Center Management.** Maintaining highly available data centers with power usage monitoring capabilities to improve operational quality, lower costs and decrease greenhouse gas emissions
- **Cybersecurity.** Safeguarding client systems and data to protect employees, financial value and brand reputation while enabling open and environmentally friendly IT operations
- **Mobile Healthcare.** Improving patient care with smart devices that bring together GPS tools, video chat and Bluetooth connectivity with healthcare applications
- **Smart Grid and Smart Meter.** Gathering and applying business intelligence with automated tools to make energy distribution systems increasingly reliable and sustainable
- **Energy Plant Sustainability.** Supporting efficient compliance with mandates to report carbon emissions, reduce consumption and improve energy performance
- **Carbon Impact Reporting and Management.** Monitoring, analyzing and displaying greenhouse gas data to meet carbon-reduction goals
- **Smart Operations.** Helping manufacturers improve worker safety and utilities reduce emissions by analyzing data from sensors, vehicle telematics and more
- **Asset Risk Management.** Overlaying the locations of facilities and other assets subject to wildfires and extreme weather to improve asset management and planning

.....
Industry analyst Forrester named CSC a “Leader” in global workplace services in 2016.

WIND POWER ANALYTICS FOR RENEWABLE ENERGY

CSC helps utilities leverage machine-to-machine learning, sensor data analytics, mobility and the cloud to holistically manage asset portfolios incorporating renewable energy. Using intelligence on weather and wind predictions, turbine and overall wind farm performance, and predictive maintenance, clients can balance the variable output of wind power with a steady supply of traditional generation sources.

.....
Alliance partner Hitachi Data Systems recently honored CSC with its Global Partner of the Year Award.

NEXT-GEN EMISSIONS TRACKING

CSC is helping the Australian government’s Clean Energy Regulator (CER) use emerging technologies to enhance the nation’s ability to meet and report on emissions reduction targets.

POWERFUL PARTNERSHIPS

Allied for Innovation

CSC accelerates clients' digital journeys through an ecosystem of more than 100 strategic alliances with the world's leading technology companies. Spanning all of our solutions, business units, organizational levels, geographies and vertical markets, these relationships provide opportunities for each partner to implement the other's products and services and to collaborate on virtually everything — from the conception and evolution of joint offerings through design and delivery.

Skilling Up

By collaborating with our alliance partners on talent development, CSC now provides all employees globally with access to on-demand training in industry-leading technologies from Amazon Web Services (AWS), EMC, Microsoft, Oracle, SAP, VMware and other innovators. More than 100 CSC technologists have earned AWS certifications, for example, and over 3,000 now hold AWS accreditations. Through partner-enabled and other training programs, we anticipate that more than half of our employees will expertly apply next-gen skills in areas such as cloud, cybersecurity and big data by 2019.

Oracle recognized CSC in the UK and Ireland with its Engineered Systems Partner of the Year Award for 2016.

Shared Priorities: Working with NGOs

To forge cross-sector relationships, CSC continually builds new partnerships with nongovernmental organizations (NGOs) that fulfill diverse missions. For example, in India this year we partnered with the India STEM Foundation to create new educational paths for students with robotics equipment and LEGO-based engineering challenges. In addition, we collaborated with India's Make A Difference foundation to support children living in orphanages and street shelters across 23 cities in India; with Habitat for Humanity to build tsunami-response houses and other homes in poor communities; and with the Akshaya Patra Foundation to supply nutritious meals to underprivileged children at school.

THE POWER OF TWO

CSC alliance partner and global enterprise applications leader SAP recently selected a CSC subsidiary, UXC Oxygen, to develop a template of core online functions to work with the SAP Hybris Commerce solution. This year SAP also recognized CSC with its Best Innovation Partner Award for our implementation of the first SAP HANA project in Vietnam.

Environment

TARGETING SUSTAINABILITY

FY 2016 has been a significant year for CSC in how we measure and report our environmental progress. With the restructuring of CSC and the formation of CSRA as a new separate entity, we have restated our environmental data to allow like-for-like comparison as we track our performance against our baseline 2012 data. This is also the first year we will report progress against our new 3-year plan, demonstrating steady improvement against challenging targets.

GOVERNANCE AND STRATEGY: OUR 3-YEAR PLAN

CSC's global environmental sustainability strategy sets out our key environmental objectives and targets for FY 2016 - FY 2018 aligned to our business goals. We review our progress annually with the CR Steering Committee, meeting to define strategic direction and set policy for the program. In the regions, our local senior executives drive agreed-upon environmental priorities, supported by regional specialists and coordinators and the global CR office.

Aligned with our top environmental priorities, our targets relate to energy consumption, waste production, management systems and external rankings. We identified these focus areas by analyzing which issues are the most critical for our environmental performance, considering stakeholder expectations and emerging trends from international policy development and sustainability rankings.

All of our reporting is now by fiscal year rather than calendar year, unless otherwise stated. Our data reporting covers facilities larger than 2,000 square feet for which CSC has operational control, across our global portfolio of offices and data centers. This covers an estimated 95% of our total floor area.

We have cut energy usage by 14.6% and greenhouse gas emissions by 14.3% against our restated 2012 baseline.

We have achieved zero e-waste to landfill for our global operations.

ENERGY AND GREENHOUSE GAS EMISSIONS REDUCTION

Several factors are driving CSC's efforts to reduce energy usage and greenhouse gas emissions. Some of the possible effects of climate change on CSC's business include increased cooling demand in our data centers, the need for resilience in the face of extreme weather events, and greater energy taxation. However, CSC benefits from a flexible infrastructure and technological expertise that help to mitigate potential adverse impacts.

We are also identifying opportunities as we adapt to a changing world. Increasing our energy efficiency can immediately lower energy costs. In addition, we can help our clients reduce their energy consumption and its associated greenhouse gas emissions.

The restated data replaces all previously reported data. However, we have retained our absolute energy and greenhouse gas reduction targets of 20% and 18% respectively, measured against a baseline of calendar year (CY) 2012 data.

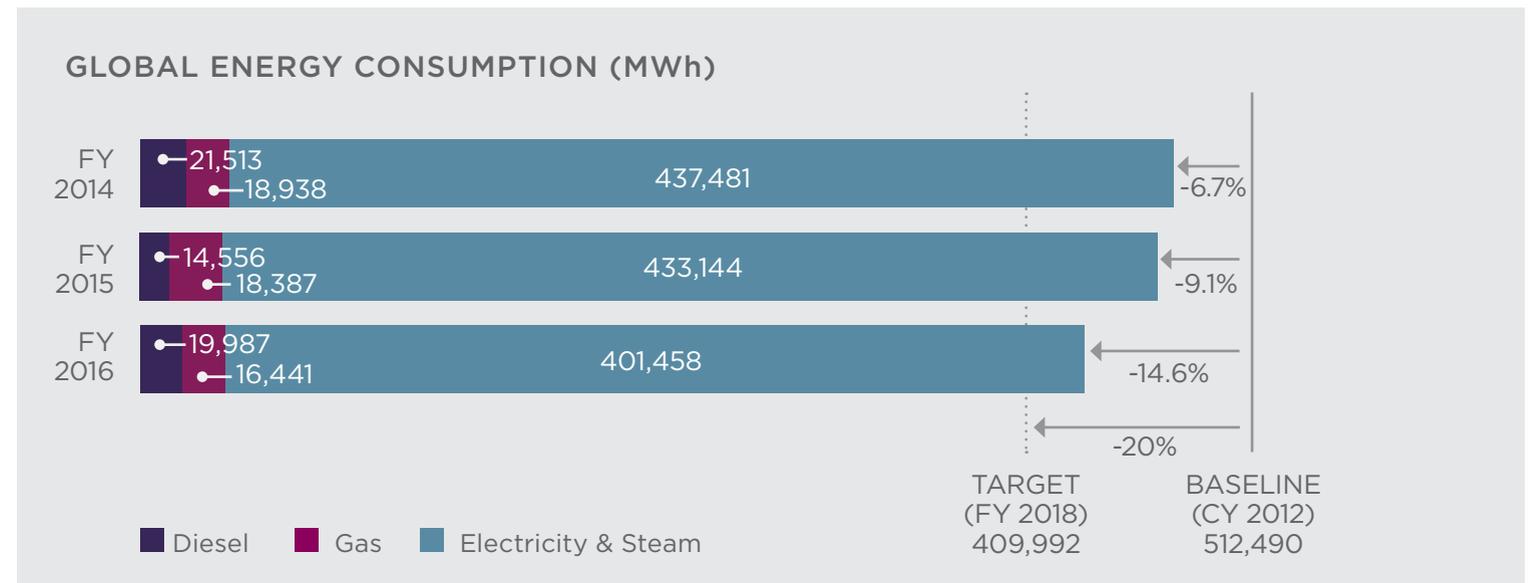

As well as removing consumption and emissions associated with CSRA buildings, we reviewed our data collection scope and methods and updated our global site list for environmental reporting. We updated our travel

data methodology to reflect best-practice reporting guidance.

We aligned our reporting to the requirements of international reporting standards such as the Greenhouse Gas Protocol. Our greenhouse gas data collection and reporting approach is externally assured, in accordance with ISO 14064-3:2006, by Lloyd's Register Quality Assurance.

Despite the data restatement, CSC is making solid progress toward our 2018 targets. This year we achieved a 14.6% reduction in energy usage and a 14.3% reduction in greenhouse gas emissions against the 2012 baseline.

The Energy Performance Management program identified more than 30 simple energy-saving measures for lighting, equipment, and heating and ventilation across our global portfolio. Simple control measures — such as adjusting set points for heating and hot water systems and switching off equipment in print rooms when not in use — have been rolled out across the globe. This work was supported by 10 detailed energy audits at key sites. All this data has been used to support the development of energy performance benchmarking to identify key opportunities for further energy performance improvement and to share best practices across CSC.

GLOBAL ENERGY INTENSITY (BY REVENUE)

	FY14	FY15	FY16
Revenue (\$M)	8,899	8,117	7,106
Intensity (MWh/\$M)	54	57	62

Case Study: Selecting Green Buildings

The new CSC corporate headquarters in Tysons, Virginia, is designed to meet the requirements of LEED Platinum certification. This is the latest in a series of CSC buildings

that have excellent energy efficiency credentials, with natural lighting, insulation and an efficient layout providing a comfortable and energizing workplace for our employees. The move supports CSC’s approach to ensure occupied strategic offices meet the highest environmental credentials demonstrated through green certifications. Similarly, the new CSC office at One Pancras Square, King’s Cross, London, is rated as “outstanding” against BREEAM. And the CSC Paris office in La Défense is designed to achieve high environmental quality against the French HQE certification, in addition to being a Platinum-certified LEED building.

Emissions associated with air and rail travel have fallen by 32.5% for our European operations between 2015 and 2016.

Case Study: Green Transportation

CSC has identified measures to reduce the environmental impact of our business travel. The assessment analyzed business mileage in Austria, France,

Germany, the Netherlands, Spain, Sweden and the UK. Measures to reduce emissions included GPS navigation optimization, evaluation of vehicle and driver performance, and improved mileage reporting. Such measures are in addition to our existing travel efficiency policy, which promotes the use of videoconferencing and other travel-saving approaches. This initiative is projected to save 285 metric tons of greenhouse gas emissions annually.

Note: To calculate the emissions figures, we used “location-based” emissions factors for purchased electricity and assumed the green tariff electricity we purchase has the same carbon intensity as normal grid energy.

Intensity metric (tCO ₂ e)	32	36	36

Case Study: Agile Workplace

CSC further developed our agile workplace capabilities this year at facilities in Singapore, London, Paris and the new Virginia headquarters. The approach allows our employees much greater freedom in their working choices and aligns with the CSC MyWorkStyle offering, which brings together a flexible operations package for workers within and outside the office to communicate and collaborate effectively.

In Paris, we moved into a new office within 3 months with union and council involvement and support. The resulting move increased the ratio of desks to employees from 1 desk to every 1.8 people to 1 desk to every 3, while maintaining space standards. The environmental benefits have also been significant. The reduction in space, together with a move to an LEED Platinum-rated building, has reduced energy consumption more than 80% at the Paris office. Ultimately, it has also reduced the amount of space being constructed by 43%.

ELECTRONIC WASTE

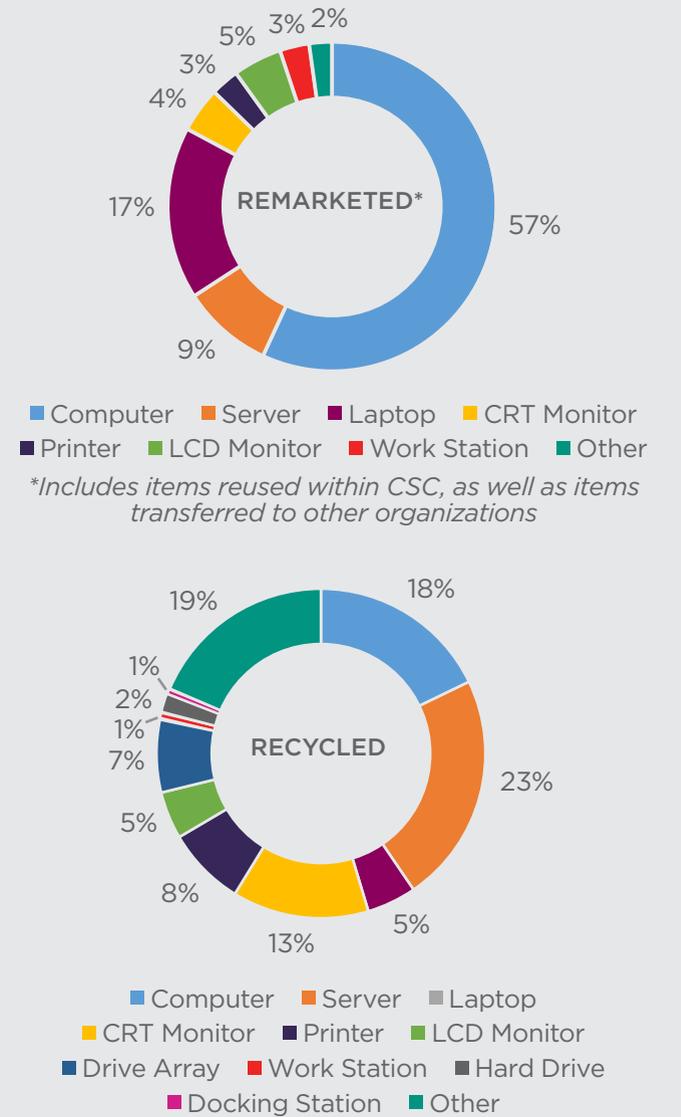

As an IT company, CSC generates electronic waste (e-waste) such as laptops, phones and servers during the normal course of our business. We test used items to determine whether they can be reused, either within the company or by other organizations. We work with certified downstream contractors to recycle items that are functionally obsolete or beyond repair to extract resources such as rare earth metals. Recycling of such materials for use in new items reduces the environmental impact of IT equipment manufacturing.

Since we are now sourcing all our e-waste management from a single global contractor, this is the first year we can report data for all countries in which we operate. We continue to meet our goal of zero e-waste to landfill. Forty-seven percent of equipment was suitable for reuse and was therefore remarketed, while 53% was beyond repair and was recycled.

We reduced energy consumption by more than 80% at our Paris office.

BREAKDOWN OF E-WASTE WEIGHT BY ITEM TYPE

MANAGEMENT STANDARDS

All CSC sites are covered by our internal environmental management processes. In addition, certification to selected environmental management standards gives our stakeholders confidence that we are managing environmental impacts rigorously and methodically, and that we are committed to continuous performance improvement. Twenty-five strategic CSC sites around the world hold the ISO 14001 Environmental Management System certification. Half of our strategic data centers have achieved the ISO 50001 Energy Management certification, and our goal is to achieve certification of 100% by 2018.

Case Study: Rolling Out ISO 50001 in Hong Kong and Kuala Lumpur

Our Hong Kong and Kuala Lumpur data centers achieved accreditation to energy management standard ISO 50001 in March 2016, bringing the total number of CSC strategic data centers holding accreditation to eight out of 16 (50%). Implementation of the standard was based on a common core set of processes to manage energy consumption, opportunities for reduction and achievement of targets, together with local processes tailored to the site activities. The resulting system and accreditation have strengthened energy efficiency and given our clients additional confidence that we manage our facilities according to best energy practice.

Our Hong Kong and Kuala Lumpur data centers achieved accreditation to energy management standard ISO 50001 in March 2016, bringing the total number of CSC strategic data centers holding accreditation to eight out of 16 (50%). Implementation of the standard was based on a common core set of processes to manage energy consumption, opportunities for reduction and achievement of targets, together with local processes tailored to the site activities. The resulting system and accreditation have strengthened energy efficiency and given our clients additional confidence that we manage our facilities according to best energy practice.

Case Study: ISO 14001 Simplification in the UK

Over the past year, changes in the UK property and environmental regulations necessitated improvements in how we operate our ISO 14001 environmental management system. CSC originally achieved certification in 2004, and the standard has helped our company deliver multiple benefits, from environmental improvements to community engagement. The simplification of the system was driven by a desire to embed the activities into the day-to-day business and align with the other management processes. This simplification has enabled greater progress visibility, much clearer monitoring and measuring of performance, and the assignment of clear responsibilities across the business.

EMPLOYEE ENGAGEMENT

Employee initiatives are an integral part of achieving our 3-year plan. We raise awareness of environmental issues within CSC through various communication tools, particularly social media and Web-based content, as well as employee events.

Case Study: Earth Day at CSC India

For Earth Day 2015, CSC joined the Indian government's Swachh Bharat ("Clean India") campaign, with cleanup drives and awareness-raising sessions

involving local communities and schools. Through the Green House Project, we collected discarded PET bottles for use as a building material in local landscaping projects, and planted trees at nearby schools. In our offices, employees viewed a film on environmental issues and made green pledges. We also examined how to reduce the environmental impact of our travel with cycling activities and carpooling.

Employees

THE FACE OF IT LEADERSHIP

With the November 2015 separation of CSC into two world-class companies, we redesigned our Employee Resource Groups (ERGs) to address the changes in demographics and needs of our workforce. After expanding these formerly local programs into a global support network, we also better aligned their missions with key business objectives. Exemplifying our investment in the diversity of CSC’s cultural fabric, these special affinity organizations give our people the tools they need to embrace the identities and passions that make them who they are. In this way, ERGs directly strengthen our business by jumpstarting our ability to recruit and retain the industry’s most skilled IT professionals, support employees in reaching their maximum potential through improved mentoring and succession planning, and accelerate revenue growth as we focus on leading in next-generation services and solutions.

CSC Abilities First

Goal: Build a dynamic network of CSC employees with disabilities to foster professional development and harness

IT innovation for a more inclusive workplace while raising awareness of the diverse abilities that make the global CSC team stronger.

Achievements: Joined forces with others speaking out against intolerance by hosting a pledge drive for “Spread the Word to End the Word,” a global campaign that amplifies the transformative power of inclusive language.

Authentic Leadership

Goal: Promote collaboration among CSC leaders to explore new perspectives that inspire employees to reach their potential by engaging deeply with who they are and what they value most.

Achievements: Strongly supported efforts by CSC leaders to help employees feel more engaged, productive and fulfilled in their work by authoring an extensive new Collaborative Authentic Leadership Model (CALM) for company-wide use.

INCLUSIVE WORKPLACE

As part of 2015 LGBT Pride Month, the CSC PRIDE ERG hosted an educational webinar that provided a forum for CSC employees who have come out as transgender at work to share their experiences and lead a dialogue with colleagues.

CSC PRIDE (People Representing Inclusive Diversity Everywhere)

Goal: Create a global community of employees with a shared commitment to raising awareness of LGBT issues throughout CSC, provide a forum for LGBT employees to network and promote CSC as an LGBT-friendly organization.

Achievements: Partnered with the London-based Kaleidoscope Trust to accelerate its work of securing the human rights of LGBT people in countries where loving relationships may bring prosecution and imprisonment.

CSC Mosaic

Goal: Encourage openness to the fullest range of multicultural traditions and perspectives while promoting ethnic diversity across our business via targeted events and information sharing, mentoring and leadership.

Achievements: Invited employees to a rich interchange with today’s IT and community leaders by hosting the “Honoring Our Heritage, Building Our Future” professional development event with the CSC-sponsored Hispanic IT Executive Council (HITEC).

CSC Salutes

Goal: Enhance career opportunities for U.S. military veterans and their spouses through resource sharing, mentoring, training and vibrant forums for

collaboration, networking and philanthropy that provides service to those who serve.

Achievements: Played a hands-on role in driving the success of the 12th Annual Operation Jumpstart event raising funds to support veterans from Operation Iraqi Freedom and Operation Enduring Freedom as they seek to access professional opportunities as civilians.

Women in Leadership

Goal: Implement ongoing programs to attract, retain, support and motivate women throughout their careers and broaden perspectives to lead CSC forward as we support an increasingly global and diverse client base.

Achievements: Celebrated CSC’s vast community of women leaders by creating a multimedia Google+ campaign that encouraged employees to share inspiring profiles of our female engineers, healthcare executives, scientists and other industry-best experts.

Young Professionals

Goal: Ease the transition to regular, full-time employment by acclimating young professionals to CSC’s culture and values, creating a venue for young professionals to connect, network and support one another as well as access mentoring and buddy systems to grow strong careers.

Achievements: Multiplied paths to professional development for new hires by creating a mentoring program that matches long-serving employees with young professionals for ongoing exchanges on strategies for workplace success, business and technical insights and career satisfaction.

STRENGTH IN DIVERSITY

Through a dedicated Global Diversity Team, targeted diversity-related recruitment, and awareness and leadership programs, CSC promotes an inclusive work environment offering all employees access to exceptional opportunities to contribute, develop and realize their potential. When colleagues respect differences and recognize the business value of diversity, we can solve problems faster, innovate and serve clients with excellence. In FY 2016, CSC in the United States received a perfect score of 100 in the Disability Equality Index (DEI), based on accessibility, community engagement and other measures.

ABILITY AND ACHIEVEMENT

CSC Solution Architect Dr. Mark Restorick was recently featured in *CAREERS & the DISABLED* magazine discussing his dedication to client service, career achievements and the CSC commitment to inclusion.

INVESTING IN OUR PEOPLE

As the global IT industry undergoes a far-reaching digital transformation, we are making significant investments in programs that empower the people of CSC to master next-generation technology skills, maximize their long-term professional development and thrive in rewarding careers.

On-Demand Learning

Through the CSC University learning management system, our employees benefit from anytime, anywhere access to thousands of training assets tailored to their specific job roles and career paths. Employees learn within and across four colleges — Leadership, Sales, Client Delivery and Technology — that align both with their professional interests and with CSC’s primary business functions. Through online courses and books, executive summaries, videos, simulations, mentoring sessions and more resources now available in 21 languages, our professionals across the globe can learn in the ways that work best for them, whether self-directed or with an instructor,

.....
This year, 4,550 CSC India employees participated in CSC-sponsored health and wellness events.

during travel or at the office and using laptops or smart devices.

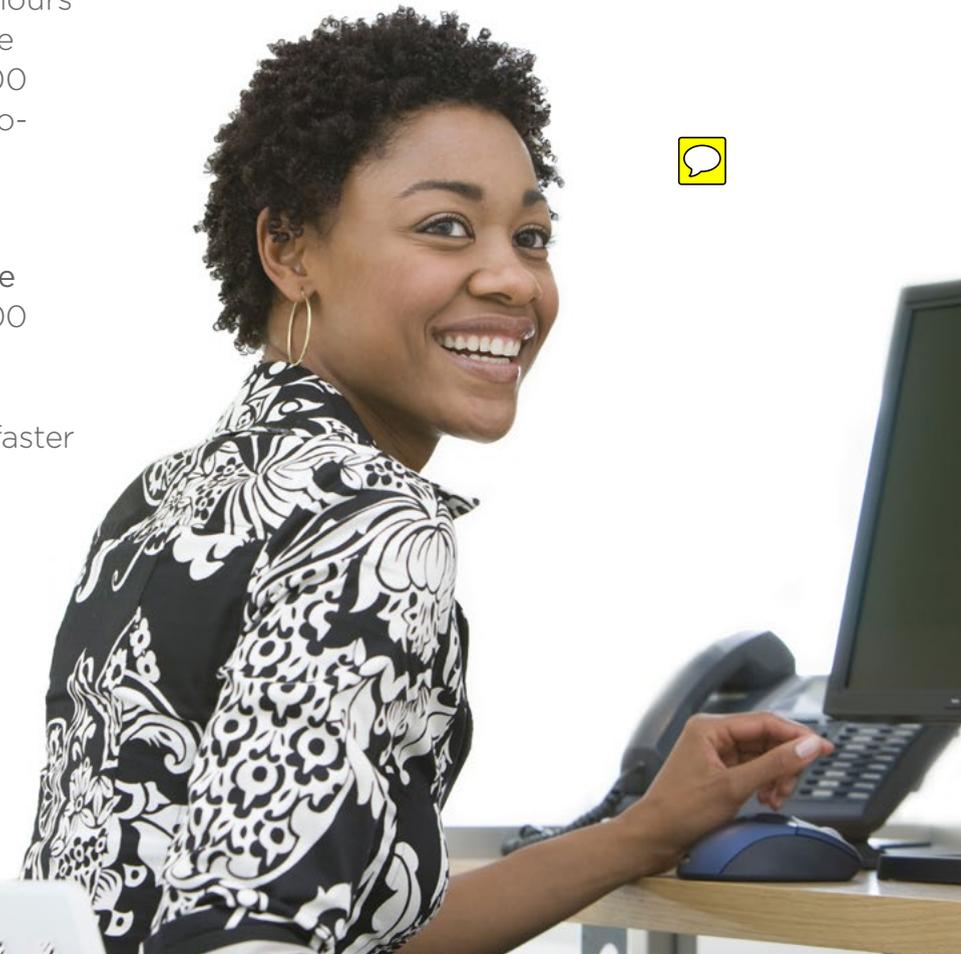

As part of ongoing investments, we recently deepened our CSC University offerings with new Learning Guides in Amazon Web Services (AWS), Hadoop and many other technologies. CSC University now supports dozens of certifications from the world’s leading technology companies, including Oracle and Microsoft, and in areas such as project management, human resources and ethical hacking. In India alone this year, CSC University e-learning hours increased 40% against FY 2015, and unique participation grew by 21% while nearly 1,000 employees gained certifications in technologies such as SharePoint and Ruby.

Next-Gen Collaboration

Through the Educate, Evaluate and Endorse (E3) Center of Excellence, more than 20,000 CSC employees have worked together to validate, share and preserve client-specific knowledge and best practices, resulting in faster onboarding for new hires, expanded career opportunities for employees and enhanced client service. And our award-winning Jive-based social media environment, C3, currently allows more than 65,000 CSC users to exchange ideas, refine best practices and develop client solutions every day through tens of thousands of communities, blogs and wikis.

FUTURE-READY SKILLS

More than 10,000 CSC technologists have completed individual development plans that are enabling them to hone skills in next-generation solutions across big data and analytics, cybersecurity, the Internet of Things, DevOps/automation, mobility, cloud and social media.

Career Growth, Accelerated

Our newly launched MyCareer@CSC portal provides all employees with robust resources and tools to accelerate career progress, bringing together skill taxonomies, clearly defined career tracks and learning paths in one intuitive framework. By improving employee engagement, the system also contributes to better client service. Similarly, the **CSC Leadership College** supports our people managers globally with the resources, learning and collaboration they need to build and motivate high-performing teams.

Through our increasingly global **Military Recruitment Program**, we provide to military-affiliated job seekers one-on-one assistance and career coaching, along with tools such as an online Skills Translator that instantly matches candidates' military job titles and specialties with CSC career opportunities. In recognition of our commitment to veterans and their families, CSC was named by Victory Media a 2016 Top Military Friendly Employer, ranking first in our industry, as well as a 2016 Top Military Spouse Friendly Employer.

Graduates who pass a rigorous assessment process that includes online aptitude testing, psychometric assessment and telephone interviews qualify to join the 2-year **CSC Graduates Program** in areas such as consulting, project management, cybersecurity and healthcare

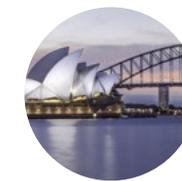

services. With ongoing support from mentors, functional leads and managers, participants learn on the job by completing increasingly complex assignments while receiving training in leadership and core business skills. We provided approximately 75 graduates with more than 4,000 training hours, ultimately achieving a 97% employment retention rate.

The related **CSC Internship Program** has grown significantly over the past 2 years, as we doubled full-time hiring of former CSC interns, made the initiative global and expanded the scope to include software development, business analysis and consulting while adding new speaker and seminar events. Based on the strength of our Internship Program, *Vault* magazine ranked CSC third on its list of Top Tech/Engineering Internship Programs for 2015.

TOP PERFORMERS

In FY 2016, CSC Marketing Manager Peter Hecht was named one of the Top 100 Business Talents in Denmark, Senior Manager Gurvinder Singh received a prestigious NEXT100 award from India's *IT NEXT* magazine, and General Manager Lisa Pettigrew was named one of the Most Powerful Women in Healthcare IT by *Health Data Management*.

CSC was named Australia's Information Security Employer of the Year for 2015 by AISA.

I AM CSC

Through the CSC Distinguished Architects program, we recognize system-level thinkers who design and deliver technically elegant, innovative and practical solutions. CSC Distinguished Engineers are industry-recognized and proven thought leaders, advisors, mentors and influencers. The CSC Awards for Technical Excellence honor those who achieve extraordinary results for our clients and make significant technology strides in the process. And the CSC Awards for Program and Project Management Excellence honor professionals who achieve critical client results and advance CSC's presence, position and prestige in our portfolio.

“As a Distinguished Architect (DA) I’ve had opportunities to engage the wider CSC technical community as a mentor and agent for change. One of the employees I mentored was working on a long-term industry project supporting mainframe code. Now she holds two next-gen certifications and is a DevOps practitioner. At CSC we talk a lot about leading our customers on a digital transformation journey, but one of the responsibilities I enjoy most in the DA role is helping CSC employees on their own skill transformation journey.”

KEVIN AYLWARD
Distinguished Architect,
United States

“When we walked onto the stage, receiving the Award for Technical Excellence in front of thousands of CSC colleagues from around the world, we felt so proud, not only for us but also for the whole CSC Vietnam. We felt encouraged to do greater work in the future, knowing everyone has the opportunity to have their excellence recognized here at CSC.”

NGHIA CHI CAO
Winning-
Team Member,
CSC Award
for Technical
Excellence

“Along with technical project management skills, I brought to the project empathy and respect to every team member and to all of our partners, leadership to give direction and a commitment to take responsibility and fulfill our promises. Now that we have overcome obstacles, the team is building a quality solution and we are a trusted partner to the client.”

GÜNTER HUHLE
Winner, CSC Award for
Program and Project
Management Excellence,
Germany

“The ability to create and shape technology solutions that transform our clients’ business is at the heart of CSC’s success. Our Distinguished Architects and Distinguished Engineers lead in this effort and apply their technical expertise to solve our clients’ toughest challenges.”

— DAN HUSHON, Chief Technology Officer, CSC

“Being Distinguished at CSC is a journey. Each individual has proven themselves able to learn, develop and practice their knowledge to enable clients and colleagues to meet, as well as exceed, their ambitions. The journey, however, does not stop at becoming Distinguished; in fact, it’s just the start of a much bigger responsibility to continue developing yourself and, most importantly, those around you.”

CARL KINSON
Distinguished Architect,
United Kingdom

“In leading your team, take decisions, allow the team to grow and be challenged, and say ‘thank you.’ Make clear commitments to the client and deliver them, while being open and honest.”

RICHARD LILLEY
Winner, CSC Award for
Program and Project
Management Excellence,
United Kingdom

“Too often we find ourselves going about our jobs without questioning if it’s really the best way. To me being recognized as a Distinguished Engineer offers the privilege of innovating beyond the demands of the day job, working with brilliant people and encouraging others to grow.”

FAISAL SIDDIQI
Distinguished Engineer,
United States

“Our client is the largest state-owned reinsurer and the eighth-largest in the world. As it is the first time for CSC implementing our digital reinsurance product SICS in China, my role as the project director is to ensure the success of the project in project finance, client satisfaction and building up the local reinsurance team.”

ELENA HONG LIAN LI
Winner, CSC Award for
Program and Project
Management Excellence,
China

We celebrate employee achievement throughout CSC with formal and informal recognitions. In addition to the CSC Award for Technical Excellence and other major honors, employee-focused programs include the Accolades initiative to spotlight exceptional dedication, and the People Manager Award for leaders who prioritize skill development and team-building, among many others.

Community

CHANGING LIVES, SHAPING FUTURES

THE CSC CHARITABLE FOUNDATION

Through the CSC Charitable Foundation we tightly align our philanthropic activities with our mission, values and business goals and strategy to maximize the difference we can make in three targeted areas where critical need exists:

Education

Fostering global literacy with a focus on science, technology, engineering and math (STEM) from kindergarten through college.

FY 2016 Highlight: Investing in communities where we do business by partnering with local charities *FIRST* and Dream Acres for Autism, donating \$25,000 to each, and showcasing the engineering proficiency of student robotics teams on a conference stage with CEO Mike Lawrie.

People and Wellness

Enhancing wellness with a focus on veterans, the disabled, child hunger and poverty.

FY 2016 Highlight: Harnessing social media to create a new CSC Gives Back office donation

drive celebrating employees in communities around the world who deliver goods and funds to the needy at food banks and shelters for the disabled, neglected and homeless.

Disaster Relief

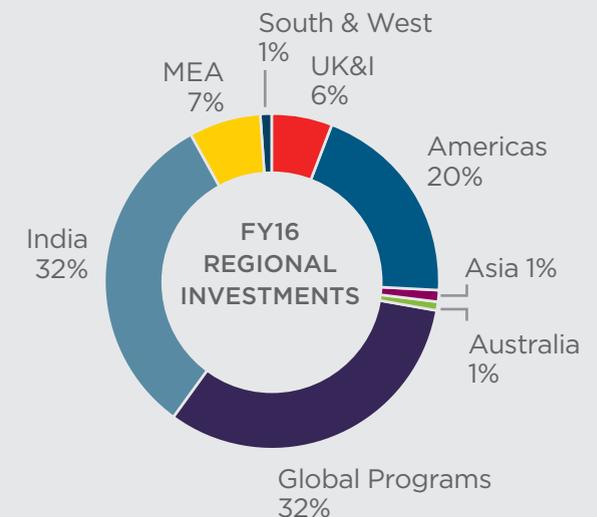

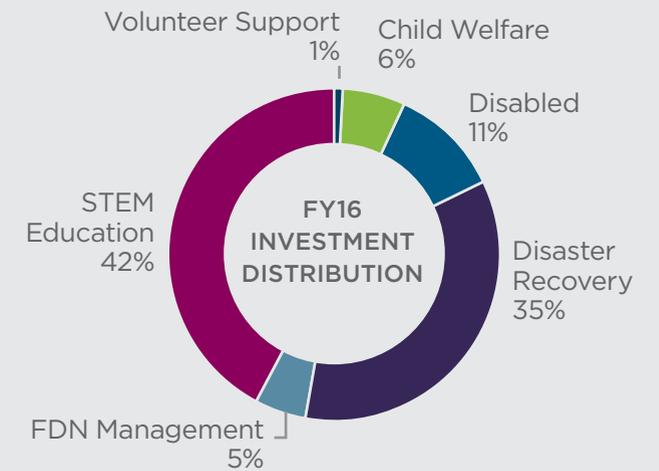

Providing emergency assistance to those in need after a disaster, crisis or trauma.

FY 2016 Highlight: Partnering with our employees to donate over \$160,000 in support of disaster relief mobilization and rebuilding efforts after the catastrophic Chennai/Tamil Nadu floods displaced 1.8 million people in December 2015.

FUNDING CRITICAL RECOVERY SERVICES

Each holiday season, thousands of employees from across CSC pull together to decide which charities will receive \$10,000 gifts from the CSC Charitable Foundation. This year we selected organizations that provide support and recovery services to those with critical needs: Doctors Without Borders and the Make A Difference foundation of India.

PERFECT FIT: LEGO, ROBOTICS AND STEM LEARNING

Embracing our CSC Charitable Foundation’s passion for robotics education, hundreds of CSC employees donated over 2,000 hours of service this year as part of our innovative Lunch ‘n’ LEGO program. In our most coordinated global giving event, employees in 25 cities worldwide came together with clients and partners from UTC, AT&T and more to donate their time. The goal? Team up and build the LEGO mission models needed to interact with student robotics creations during CSC-supported *FIRST* LEGO League competitions.

By supporting the tournaments in this way we helped further the league’s mission of using the fun of robotics and LEGO to inspire students ages 6 to 14 as they explore the STEM skills they will need at school and work. Participants also learn values such as gracious professionalism and respect, and apply lessons in research projects focused on real-world issues. Through the Lunch ‘n’ LEGO program, our employees connected more deeply with their local *FIRST* LEGO League organizations, where they were invited for additional volunteering opportunities such as judging at tournaments and mentoring teams, significantly extending the CSC commitment to community engagement, robotics and STEM education.

“From a volunteer standpoint, we do just about everything: We judge at championship events, we help launch new *FIRST* LEGO League teams, and we host LEGO-build parties with staff members, partners, clients, families and sponsored teams. We’ve donated dozens of laptops from our surplus pool to schools in need, including First Nations schools. And we are donating 80 laptops to the *FIRST* Canada library program to introduce even more children to STEM through LEGO. I look at these students as our future leaders, clients, partners and colleagues.”

— JIM FORBES, CSC Account Executive and *FIRST* Robotics of Montreal Outstanding Volunteer of the Year

.....

CSC employees donated over 4,000 hours of service across eight countries and 28 cities to *FIRST* Robotics organizations, including *FIRST* LEGO League, *FIRST* Tech Challenge and *FIRST* Robotics Competition.

CSC IN INDIA: THE POWER OF ENGAGEMENT

With dozens of multifaceted community outreach programs, CSC in India makes a positive difference in the lives of children and their families by funding education, building homes, feeding the hungry and leading crucial efforts for disaster relief and conservation. In FY 2016 we:

- Helped educate orphaned children by partnering with India’s Make A Difference foundation to develop career planning courses and job skills workshops while working to improve the students’ living conditions. **Results:** Supported 771 children from shelter homes across Chennai, Delhi, Bangalore and Hyderabad as they received critical services and gained the vocational skills to thrive in today’s workplace.
- Supported the Akshaya Patra Foundation in building India’s human resource base and improving graduation rates with our participation in the abundant meals for education program. **Results:** Provided CSC-funded meals for 616 students at three schools for 1 year in the Vadodara area.
- Funded aid to victims of the 2015 Chennai flood, including some CSC employees, by collaborating with Habitat for Humanity of India on rapid-response housing rehab efforts. **Results:** Raised \$55,000 in employee and matching donations that funded repair, reconstruction and renovation of schools in Polichalur and homes near our Chennai office.
- Supported efforts to speed food and clothing to victims of the 2015 Nepal earthquake suffering hardships in cold weather. **Results:** Funded and donated 2,000 blankets to displaced families along with wool clothing, dry food and medicine.
- Provided educational support to disadvantaged students through a weekly Corporate Mentorship program onsite at CSC offices, the donation of MP3 players to visually challenged college students, and employee-funding of higher-education grants. **Results:** Enabled hundreds of students who face significant disadvantages to explore key academic subjects in depth, maintain motivation to stay in school and become job-ready.
- Conducted multiple cleanup drives in polluted coastal areas and damaged landscapes in need of caretaking and reforestation. **Results:** Fielded large work crews of up to 450 employees for projects that included collecting trash and debris along the full Chennai coastline and planting 350 saplings on campuses and in nature preserves.

At Make A Difference foundation’s “Be a Spark” workshops, more than 100 CSC employees in India gained in-depth training in strategies for mentoring abused and abandoned children.

In India, 6,820 CSC employees donated more than 8,590 volunteer hours to corporate responsibility projects in FY 2016.

CARING ACROSS BORDERS

Germany: Refugee Response

Working with Initiative D21, a Berlin-based nonprofit, and other partners, CSC in Germany helped create the next-gen Refugee Support Platform in

response to societal challenges posed by the 2015 – 2016 European migrant crisis. The platform provides an efficient online space for government officials to quickly access refugee-related IT services. Extending this work, we founded a refugee assistance coalition bringing together 150 senior leaders from corporations, nongovernmental organizations and public sector agencies to shape collaborative digital responses to the migrant crisis.

Vietnam: Mobilizing for Charity

This year CSC employees in Vietnam delivered school supplies and financial gifts to a Ho Chi Minh City shelter that provides

housing, food and educational services to vulnerable children from remote mountain areas. We coordinated similar support and volunteer

activities during the holiday season for the Thanh Tam Center, a community organization that delivers services to disabled children.

Nordics and Baltics: Environment and Education

To promote environmentally friendly practices, this year our teams participated in European Mobility

Week by extensively using social media to document their new, greener commuting routines. Through a Donate a Book campaign, employees shared the gift of reading with underprivileged children and their families.

South Africa: Digital Futures

A CSC-created mobile computer lab at the St. Therese Center and a STEM learning center at Tenterden Place of

Safety in Cape Town have enabled at-risk children to access digital encyclopedias, games that teach numeracy and more. And this year in Limpopo, the country's poorest province, we funded and delivered packages of health items to parents of newborns at public

hospitals that rely on our enterprise management solutions to help doctors and nurses improve patient care.

Latin America: A Drive to Give

This year CSC in Brazil donated dozens of laptops to a Sao Paulo hospital to help create a state-of-the-art IT lounge for patients and their families. Additional charitable efforts included multiple, coordinated campaigns to collect and donate school supplies, toys, winter clothes and shoes to poor children and their families.

United Kingdom: Empowering Youth

In FY 2016 we supported UK charity FutureVersity in its mission to expand educational opportunities

for youth as a means to reduce unemployment, crime and racial tensions. While providing direct funding, computers and IT consulting services, we also hosted employee-led job-skills workshops for FutureVersity students at CSC facilities. This year our UK team also raised more than \$40,000 in total for the Derian House children’s hospice in Chorley; provided volunteer contact center support for Sport Relief 2016; and coordinated regular donations to the food bank of the Glasgow City Mission, which serves homeless and vulnerable people, including children.

North America: Diverse Impacts

In partnership with Women in Technology, our Women in Leadership ERG in the Washington, DC, area hosted a “Share Our Success” event at our corporate headquarters, where 60 female high-school students participated in a seminar on STEM careers and curricula. CSC employees donated 300 toiletry kits this year to a shelter that serves women and men in need, and raised funds for people with intellectual disabilities by participating in the 2015 Best Buddies Friendship Walk on the National Mall.

Australia and New Zealand: Working for Change

This year CSC software engineer Adrian McKenzie completed a 23-day ride from Cape Reinga to Bluff on a specially designed

tandem bicycle to raise awareness and money for New Zealand’s Halberg Disability Sports Foundation. The Foundation, which seeks to enhance the lives of the physically disabled through sport and recreation, had provided Adrian’s seven-year-old son, Ted, who has cerebral palsy, with a grant to purchase the bike. Colleagues, clients, partners and professional athletes all played an active role in raising over AU\$57,000 toward the cause. As part of the 2016 OzHarvest CEO Cookout, Seelan Nayagam, CSC managing director and vice president for Australia and New Zealand, partnered with professional chefs to serve meals to over 1,000 hungry and homeless Australians while raising AU\$18,560.

Employees in Australia raised AU\$23,500 to fight multiple sclerosis on the 90 km Sydney to the Gong charity ride.

WINNING TEAMWORK

Along with winning the Corporate Games UK title for the fourth straight year and earning the Medalist Award for most medals won, our 270-employee team raised more than \$30,000 for the Starlight Children’s Foundation and other charities.

CSC employees participated in the Best Buddies Friendship Walk in Washington, DC.

Digital Inclusion and Accessibility

OPENING DOORS TO INNOVATION

At CSC, we believe that everyone should have far-reaching opportunities to use and benefit from technology. That’s why we commit to making our technology as inclusive and accessible as possible, for our employees, customers and the communities we serve. By designing products and services to be more digitally accessible, we can help make it easier for individuals to personalize their devices to meet diverse needs, and we can contribute toward eliminating some of the barriers people with disabilities experience. Today we continue to work with our partners, suppliers and the public and private sectors to develop innovative ideas that improve digital inclusion and accessibility. These are the principles that guide us:

- **Accommodate the Needs of CSC Employees.** We strive to help our employees access information in many formats, such as large-print, Braille and video captioned. Employee relations specialists often work directly with employees, managers and HR representatives to assess requests.
- **Provide Accessible Technologies and Solutions.** Wherever possible, we favor the IT hardware, software and Web application services that are most accessible. This includes access by people with disabilities and accessibility delivered directly or in combination with assistive technology. Based on the particular software or solution, its use and the market in which it will be used, adjustments can include compatibility with screen readers, support for screen/font upsizing and the avoidance of color-based screen indicators.

- **Promote Digital Inclusion.** Working with local communities, CSC’s employee volunteering and mentoring programs help individuals and organizations develop their digital capabilities by delivering basic digital skills programs.

TECHNOLOGY AND OPPORTUNITY

In the Chennai area of India, we set up a computer lab to educate underprivileged students and adopted three rural villages to provide educational support. CSC volunteers teach the children to operate the system as they gain hands-on experience with computing basics. We are looking to develop five more computer labs in India. Similarly, in Cape Town, South Africa, we opened a STEM learning center for at-risk minors who are placed in state custody by the children’s court. The center focuses on educating children in STEM disciplines to develop strong foundations for rewarding careers in our increasingly technology-based economy.

CSC/HPE Enterprise Services Proposed Merger: ADDITIONAL INFORMATION AND WHERE TO FIND IT

In connection with the proposed transaction, Everett SpinCo, Inc., a wholly-owned subsidiary of Hewlett Packard Enterprise created for the transaction (“Spinco”), will file with the SEC a registration statement on Form S-4/S-1 containing a prospectus and CSC will file with the SEC a proxy statement on Schedule 14A and a registration statement on Form S-4 containing a prospectus. INVESTORS AND SECURITY HOLDERS ARE ADVISED TO READ THE REGISTRATION STATEMENTS/ PROSPECTUSES AND PROXY STATEMENT WHEN THEY BECOME AVAILABLE, BECAUSE THEY WILL CONTAIN IMPORTANT INFORMATION ABOUT THE PARTIES AND THE PROPOSED TRANSACTION. Investors and security holders may obtain a free copy of the prospectuses and proxy statement (when available) and other documents filed with the SEC by CSC, Hewlett Packard Enterprise and Spinco at the SEC’s web site at <http://www.sec.gov>. Free copies of these documents, once available, and each of the companies’ other filings with the SEC, may also be obtained from CSC’s web site at www.csc.com.

This communication is not a solicitation of a proxy from any investor or security holder. However, CSC, Hewlett Packard Enterprise, and certain of their respective directors, executive officers and other members of management and employees, may be deemed to be participants in the solicitation of proxies from stockholders of CSC in respect of the proposed transaction under the rules of the SEC. Information regarding CSC’s directors and executive officers is available in CSC’s 2015 Annual Report on Form 10-K filed with the SEC on June 8, 2015, and in its definitive proxy statement for its annual meeting of stockholders filed on June 26, 2015. Information regarding Hewlett Packard Enterprise’s directors and executive officers is available in Hewlett Packard Enterprise’s 2015 Annual Report on Form 10-K filed with the SEC on December 17, 2015, and in its definitive proxy statement for its annual meeting of stockholders filed on February 12, 2016. These documents as well as other documents filed by CSC, Hewlett Packard Enterprise or Spinco with the SEC can be obtained free of charge from the sources indicated above.

Other information regarding the participants in the proxy solicitation and a description of their direct and indirect interests, by security holdings or otherwise, will be contained in the registration statements, prospectuses and proxy statement and other relevant materials to be filed with the SEC when they become available.

This communication shall not constitute an offer to sell or the solicitation of an offer to sell or the solicitation of an offer to buy any securities, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offer of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the Securities Act of 1933, as amended.

All statements in this presentation that do not directly and exclusively relate to historical facts constitute “forward-looking statements.” These statements represent the Company’s intentions, plans, expectations and beliefs, and are subject to risks, uncertainties and other factors, many of which are outside the Company’s control. Many factors could cause actual results to differ materially from such forward-looking statements with respect to

the transaction announced above including risks relating to the completion of the transaction on anticipated timing, including obtaining shareholder and regulatory approvals, anticipated tax treatment, unforeseen liabilities, future capital expenditures, inability to achieve expected synergies, loss of revenues, delay or business disruption caused by difficulties in integrating the businesses of CSC and Enterprise Services. For a written description of risk factors that could cause actual results in CSC’s business to differ materially from forward looking statements regarding those matters, see the section titled “Risk Factors” in CSC’s Form 10-K for the fiscal year ended April 1, 2016 and any updating information in subsequent SEC filings. The Company disclaims any intention or obligation to update these forward-looking statements whether as a result of subsequent
